

We change destinies

Vision of yourchance o.p.s. 2030

We are creating a society in which neither a person's background nor their life circumstances determine their future. We lead people towards personal prosperity through education, entrepreneurship and financial literacy. We change human destinies. This is why yourchance exists.

yourchance is a trusted partner for everyone who wants to create long-term social change. We connect the Czech Republic with the world and transfer proven solutions.

We are building an interconnected across the public, business and nonprofit sectors. We support young people leaving alternative family care, people starting a new life in the Czech Republic, and schools preparing the next generation for an economically responsible and active life.

Our work goes beyond individual projects. Together with schools, companies, public administration and civic initiatives, we create systemic changes that strengthen the long-term prosperity of individuals and society as a whole.

We are a **national leader** in financial literacy, entrepreneurship development and support for the economic self-sufficiency of socially disadvantaged groups. Our methodologies, educational programmes and certification systems help transform education in the Czech Republic and inspire partners in other countries across Europe and Asia.

Every year, we change the lives of thousands of people through direct support and create systemic changes that influence hundreds of thousands more through schools, employers, public institutions and our partners.

We **share our know-how internationally and build bridges between the public, business and nonprofit sectors**. We believe that genuine social change happens when people, organisations and countries work together.

Our long-term stability is built on responsible financial management, our own assets, entrepreneurial activities and the trust of our donors. This enables us to remain an independent partner capable of creating long-term social impact.

yourchance is a symbol of the belief that human destiny is not determined by circumstances. It changes when opportunity meets courage, education and people who believe that everyone deserves their chance.

Where We Are Heading by 2030

By 2030, we aim to help make financial literacy a natural part of every child's education in the Czech Republic and to ensure that schools systematically develop the competencies that lead to the personal and economic prosperity of the next generation.

We are building a national network of schools that prepare children for the economic realities of the 21st century.

Through a certification process, the sharing of best practices, teacher training and long-term partnerships, we help schools transform the way they approach financial literacy, entrepreneurship, responsible decision-making and an economic mindset.

Our goal is not to create yet another educational programme. Together with schools, we want to build an environment in which responsible money management, entrepreneurship, long-term planning and the ability to create prosperity become a natural part of school culture.

The impact of this approach extends beyond the school environment. It influences families, connects generations, supports social mobility and contributes to more responsible economic behaviour across society. Schools thus become natural hubs of positive change that reaches far beyond their walls.

yourchance will continue to develop methodologies, innovative educational tools, the certification system and partnerships with schools, expert institutions, public authorities and the private sector. Through the Grow Global strategy, implemented by yourchance Global, we will also share our proven know-how with other countries, contributing to the development of economic education internationally.

By 2030, we aim to complete the second stage of the system's transformation.

We are building a national ecosystem to support young people transitioning from alternative family care to independent life. At the same time, we are opening it up to other groups of socially disadvantaged youth and young adults.

Our goal is not to expand our own organisation, but to create an environment in which individual stakeholders work together as part of one functional system. yourchance will develop its shared infrastructure – shared information, digital tools, a map of services, methodologies, coordination, impact evaluation and communication. Direct services will gradually be provided by organisations and institutions where they are closest to young people, primarily at the regional level, in line with the direction of government policy in this area.

Our role is to be an independent architect, coordinator and innovator of the entire ecosystem – an organisation that connects stakeholders, builds shared infrastructure and helps other actors work together to create a functional support system.

At the same time, we will continue to provide services that are currently missing, while developing and piloting new solutions that respond to the changing needs of young people. Once proven effective, we will transfer them to other partners so that they can become a standard part of the support system throughout the Czech Republic.

By 2030, we aim to create a new generation of people who naturally connect the Czech Republic and Ukraine. People who understand both languages, cultures and working environments and who can become drivers of cooperation, investment, entrepreneurship and social reconstruction.

We are building human capital for long-term cooperation between the Czech Republic and Ukraine.

We combine capacity building in Ukraine, the transfer of Czech know-how and the creation of socio-economic bridges between the two countries. The Czech experience of economic and social transformation can contribute valuable insights in areas such as entrepreneurship, education, financial literacy, civil society, the position of women, support for people with disabilities and social innovation.

Our goal is not only to support people who have come to the Czech Republic. We want to prepare professionals, entrepreneurs, employees, community leaders and cultural intermediaries who will be able to work with Czech companies, institutions and organisations in the long-term reconstruction of Ukraine.

In 2022, we helped people start a new life. In 2026, we are helping them succeed. By 2030, we are building a prosperous partnership between two countries.
