

Local roots. Changing destinies globally.

yourchance Global z.ú. Vision 2030

We are connecting a world where neither birthplace nor life circumstances dictate a person's future. We guide people to personal prosperity through financial literacy education, entrepreneurship development, and business ownership. We change human destinies – regardless of borders. That is why yourchance Global exists.

yourchance Global is a trusted partner for organizations, institutions, and individuals who want to create long-term social change in their country. We connect the experience gained in the Czech Republic with international cooperation, and together with our partners, we create proven models of social change for various countries and cultural environments.

We are building an international ecosystem of partnerships across the public, business, and non-profit sectors, in which local organizations, schools, companies, and institutions adapt our methodologies, educational programs, and digital tools according to the needs of their country, culture, and communities. We do not create a universal solution for the whole world – we help our partners create their own.

Our work goes beyond the borders of individual countries. Together with local partners, we create systemic changes that strengthen the prosperity of people and entire societies in the long term.

We are a respected source of proven models of social change in the areas of financial literacy, entrepreneurship development, and support for the economic self-sufficiency of socially vulnerable groups. We share our experience, methodologies, and digital tools with partners in other countries and jointly develop them further through international cooperation.

Our international cooperation rests on three strategic platforms. Through Financial Literacy World, we support the systemic transformation of economic education. The MOST | MOCT platform develops long-term Czech-Ukrainian cooperation and contributes to the renewal of Ukraine's human capital. We are gradually building the Rise & Grow platform as an internationally adaptable model for supporting personal prosperity, entrepreneurship, and economic self-sufficiency. We believe that real social change happens when people, organizations, and countries work together. That is why we build bridges between countries – we transfer experience to where it can help, and at the same time, we learn from our partners ourselves.

Our long-term stability and independence rest on responsible financial management, proven partnerships, and the trust of the organizations we work with. Thanks to this, we are a reliable partner capable of creating long-term social impact even beyond the borders of the Czech Republic.

yourchance Global is a symbol that proven solutions have no borders. We have local roots – we have a global impact.

Local Roots. Changing Destinies Globally.

Where we are heading by 2030

We guide people to personal prosperity

Personal prosperity is the ability to recognize and fulfill one's mission and at the same time create wealth for oneself and one's family, all with regard to the long-term sustainability of one's health and high-quality relationships.

We believe that personal prosperity is precisely the prerequisite for a prosperous society. Therefore, through education in financial literacy, entrepreneurship, and support for business ownership, we guide people to be able to take responsibility for their lives, develop their potential, and create value for themselves and their surroundings.

By 2030, through the Financial Literacy World platform, we want to **create conditions** so that **in selected partner countries, financial literacy, entrepreneurship, and economic thinking are among the basic competencies developed at primary and secondary schools, and at the same time are part of the non-formal education of socially vulnerable groups.**

Together with our partners, we are building an international ecosystem of schools, teachers, educational institutions, experts, and employers who adapt proven methodologies, digital tools, and certification models according to the needs of their country, culture, and educational system.

Our goal is not to transfer the Czech educational model, but together to create proven **models of economic education that will contribute to the personal prosperity of individuals and the prosperity of the entire society in the long term.**

By 2030, we want to **create an internationally adaptable model for supporting personal prosperity for socially vulnerable groups of young people and adults.**

We are building an **ecosystem of opportunities** that connects non-formal education, mentoring, digital tools, community support, employers, entrepreneurs, and other partners. Its goal is not to replace existing services, but to strengthen their cooperation and create an environment in which people gain a real opportunity to take responsibility for their lives, develop their potential, and achieve economic self-sufficiency as well as personal prosperity.

Our goal is not to create a uniform international program. Together with local partners in partner countries, we are building an open model that each country adapts according to its social conditions, culture, and the needs of target groups.

Our role is to **be the architect, coordinator, and innovator of this ecosystem.** We create a common infrastructure, share proven methodologies, digital tools, and experience, and support the creation of new partnerships.

At the same time, together with partners, we will pilot new models of support responding to the changing needs of individual countries. We will document, develop, and share proven solutions so that they can become a natural part of local support systems.

MOST | MOCT symbolizes the connection of two languages, two cultures, and two countries. It is a platform that connects people, experiences, and opportunities, and creates long-term socio-economic bridges between the Czech Republic and Ukraine.

By 2030, we want to **support the emergence of a new generation of people who will naturally connect the Czech Republic and Ukraine.** People who understand both languages, cultures, and work environments, and can become carriers of cooperation, investments, entrepreneurship, and social renewal.

We are building human capital for long-term cooperation between the Czech Republic and Ukraine. We are preparing experts, entrepreneurs, employees, community leaders, and cultural mediators who will be able to develop partnerships between the two countries and contribute to the renewal and modernization of Ukraine.

We connect **capacity building** in Ukraine, the transfer of Czech experience, and the **creation of socio-economic bridges** between the two countries. We share experiences from the economic and social transformation of the Czech Republic and, together with partners, adapt them to the needs of a recovering Ukraine in the areas of entrepreneurship, education, financial literacy, civil society, women's empowerment, support for people with disabilities, and social innovation.

We create long-term partnerships among people, organizations, companies, and institutions of both countries and contribute to building a shared future based on trust, shared experiences, and mutual development.
